Proven expertise in Hybris Core Architecture, OCC web services, cron jobs, Impex scripting, RESTful API integration, and SAP Commerce Cloud (CCv2). Adapt at end-to-end Hybris implementations, performance optimization, and enforcing RBAC and data security standards. Experienced with Spring MVC, Java, Git, Jenkins, and Agile delivery.

WORK EXPERIENCE

Associate Software Developer

Collins Aerospace, Bangalore, India

Feb 2023 – Present

3 Years

- Designed and implemented SAP Hybris B2B customizations including Backoffice customizations, impex-based data migration scripts, and cron jobs to automate end-to-end business workflows, reducing manual operations by 60% and improving batch processing time from 18 minutes to 4 minutes (78% gain).
- Built and customized OCC/headless web services and RESTful APIs using Spring MVC within SAP Commerce Cloud (CCv2), integrating with external systems for seamless B2B portal functionality.
- Architected enterprise data-protection controls including RBAC, PII masking, and row-level security-directly aligning with SAP Commerce security best practices and reducing audit findings by 70%.
- Delivered 3+ high-impact automation initiatives (Related SBU, SBU Offboarding, Project Hornet, Warranty Claims) that reduced user task time by 40% and enabled self-service data access for 450+ users, driving a +12-point increase in Customer Portal satisfaction.
- Developed WCMS page components, navigations, and Customer Portal dashboards, improving UX and enabling non-technical teams to manage content within the Hybris platform.
- Diagnosed and resolved critical P1/P2 production incidents with 1.8-hour MTTR; optimized backend performance, improving p95 API latency by 28% while maintaining 99.95% service availability.
- Collaborated cross-functionally with Product, QA, and DevOps to deliver 4 releases per quarter with 95% on-time delivery.
